product overview

McDowell-Craig Tables may be used in a variety of office and institutional environments — such as conference areas, office workstations, classrooms, computer training and lunch rooms. Besides their versatility, these tables are built to last.

tops

Table tops are constructed of 1-3/16" industrial grade particle board covered with high pressure, plastic laminates, and self edged or vinyl edged.

top laminates

Standard Laminates – A variety of laminate patterns, solids, and wood grains are available. See McDowell-Craig Plastic Laminates Selection Guide for standard selections.

Special Laminates – Worksurfaces may be ordered with factory approved special laminates – add 8% to price of unit. + \$500 per pattern per order.

Note: written factory approval must accompany your order.

base construction

Tables are supported by rigid, steel tubular bases – engineered and manufactured to last. Each base leg includes an adjustable glide to compensate for uneven floors.

base finishes

Standard Enamel – Table bases are available in a variety of color coordinated, high solid baked enamel finishes (See McDowell-Craig Enamel Selection Guide).

Special Enamel – Components may be ordered in factory approved special high solid baked enamel finishes – add 8% to price of unit + \$850 set-up & mixing charge per color per order. *Note: written factory approval must accompany your order.*

conference tables
T-legs

please specify:

- model number
- enamel
- laminate

standard features include –

All tables come standard with a 1-3/16" thick top. All bases come standard with adjustable floor glides.

square table
